Contents

Effects of temper-embrittling heat treatment on ductile failure in high-strength low-alloy steel. J. E. King and J. F. Knott 1
Oxidation of intermetallic compound NiAl. R. Hutchings, M. H. Loretto, and R. E. Smallman 7
Evaporation of elements from 20Cr–25Ni–Nb stainless steel during vacuum annealing. R. C. Lobb and H. E. Evans 14
Ordering transformations in Fe–50Co based alloys. M. Rajkovic and R. A. Buckley 21
High-temperature flow and aging behaviour of oxygen-enriched Zircaloy–2 and Zr–2·5Nb. R. Choubey and J. J. Jonas 30
Effect of precipitation strengthening on high-temperature creep in Incoloy 800 type steel. A. Orlova and J. Čadek 39
Effects of trace elements on creep strength and ductility of low-carbon 2·25Cr–1Mo steels. D. J. Gooch . 45
Superplasticity in aluminium–palladium eutectic alloy. G. Piatti and M. Bardy 55
Role of molybdenum in phosphorus-induced temper embrittlement of 12%Cr martensitic stainless steel. R. Guillou, M. Guttmann, and Ph. Dumoulin 63
Grain-boundary cavity growth during high-temperature creep and fatigue. K. U. Snowden, D. S. Hughes, and P. A. Stathers 73
Interaction of cleavage cracks with forest dislocations in zinc. C. Messmer, J. C. Bilello, and D. Dew-Hughes 79
Possible explanation for unexpected departures in hydrostatic tension–fracture strain relations. A. G. Atkins 81
Micromechanisms of crack extension in A302 steel in upper-shelf region. G. Airoldi 84
Recrystallization and grain growth in deformed and tempered carbon steels. K. Onel and J. Nutting . . 89
Work hardening of dual-phase steels. N. K. Balliger and T. Gladman 95
Microstructure and texture of cold-rolled Cu–10Zn brass. P. T. Wakefield and M. Hatherly 109
Melting and solidification during dynamic powder compaction of tool steel. D. G. Morris 116
High-temperature *J*-integral measurements and micromechanisms at crack tip of ceramic materials. K. Kromp and R. F. Pabst 125
Fracture behaviour of ceramic materials at high temperatures. G. Popp and R. F. Pabst 130
Discussion 133
1980 Acta Metallurgica Gold Medal . . . . . *(inside back cover)*
Precipitation sequences in heat-affected zone of 2·25Cr–1Mo steel during stress-relief heat treatment. C. A. Hippsley 137
Interdiffusion in two-phase ternary solid systems. G. W. Roper and D. P. Whittle 148
Reheat cavity nucleation and nucleation control in bainitic creep-resisting low-alloy steels: roles of manganese sulphide, residual, and sulphur-stabilizing elements. C. J. Middleton 154
Correction to solid–liquid partition coefficients in Fe–Cr–C alloys. A. J. W. Ogilvy, A. Ostrowski, and D. H. Kirkwood 168
Driving force for martensitic transformation in steels. H. K. D. H. Bhadeshia 175
Short communication **Thermodynamic extrapolation and martensite-start temperature of substitutionally alloyed steels.** H. K. D. H. Bhadeshia 178
Short communication **Strontium modification of Al–12·7 wt-%Si alloys.** S. M. D. Glenister and R. Elliott 181
Void nucleation in spheroidized carbon steels Part 1: Experimental. J. R. Fisher and J. Gurland . . . 185
Void nucleation in spheroidized carbon steels Part 2: Model. J. R. Fisher and J. Gurland 193
SEM study of origin of Goss texture in Fe–3·25Si. N. C. Pease, D. W. Jones, M. H. L. Wise, and W. B. Hutchinson 203
Superplastic behaviour of powder-consolidated nickel-base superalloy IN–100. R. G. Menzies, J. W. Edington, and G. J. Davies 210
Microstructural changes during recrystallization of powder-consolidated nickel-base superalloy IN–100. R. G. Menzies, G. J. Davies, and J. W. Edington 217
Near-threshold behaviour of polycrystalline copper. W. Hessler, H. Müllner, B. Weiss, and R. Stickler . 225
Discussion 231
Effects of grain size and stacking fault energy on fatigue-crack-propagation thresholds in Cu–Al aluminium alloys. Y. Higo, A. C. Pickard, and J. F. Knott 233
Relationship between microstructure and acoustic emission in Mn–Mo–Ni A533B steel. C. B. Scruby, C. Jones, J. M. Titchmarsh, and H. N. G. Wadley 241
Fracture topography of WC–Co hardmetals. C. Lea and B. Roebuck 262
Formation of protective oxide film on chromium-depleted stainless steel. R. C. Lobb and H. E. Evans. . 267
Short communication **Evaluation of surface-diffusion coefficients from grain-boundary grooving data on Mo, Mo–Re, and Cr.** S. R. Srinivasan 275
Effect of austenite grain size and thermal history on low-temperature intergranular fracture of Ni–Cr–Mo–V rotor steel. A. Poli, R. D'Anna, and G. Buzzichelli 278
Reaction in copper–lithium system and its implications for liquid-metal embrittlement. C. F. Old and P. Trevena 281
Modification of Al–Si eutectic alloys with Na. S. C. Flood and J. D. Hunt 287
Intergranular creep-cavity formation in low-alloy bainitic steels. B. J. Cane and C. J. Middleton . . . 295
Mechanistic control regimes for intergranular cavity growth in 2·25Cr–1Mo steel under various stresses and stress states. B. J. Cane 302

Contents

Effect of thermal cycling on microstructural stability of unidirectionally solidified eutectic composite. J. Billingham and S. P. Cooper . . . 311
Micromechanisms of fatigue crack growth exposed to load transient effects. Y. Katz, A. Bussiba, and H. Mathias. . . . 317
Load transference across crack faces during fatigue crack growth at positive values of *R* in low growth rate regime. I. C. Mayes and T. J. Baker . . . 320
Structure of crack-tip plastic zone in high-strength aluminium alloys as function of microstructure. J. Albrecht and G. Lütjering . . . 323
Recrystallization behaviour of {110}⟨112⟩ aluminium single crystals after rolling and plane-strain deformation. H. W. F. Heller, J. H. van Dorp, G. Wolff, and C. A. Verbraak . . . 333
Thin-foil-surface sink strengths when surface denuded zones are present. R. Bullough, M. H. Wood, and S. M. Pierce . . . 342
Phase equilibria in Ni-rich region of Ni–Al–Hf system. P. Nash and D. R. F. West. . . . 347
Phase equilibria in Ni-rich region of Ni–Cr–Hf system. P. Nash and D. R. F. West. . . . 353
Effects of dispersoid particles on toughness of high-strength aluminium alloys. C. Q. Chen and J. F. Knott 357
Creep of type 316 stainless steel at low stresses. T. Sritharan and H. Jones . . . 365
Microstructure of Fe–Co–2V and Fe–Co–V–Ni alloys containing 1·8–7·4 wt-%Ni. C. D. Pitt and R. D. Rawlings . . . 369
Critical assessment **Shapes of pores in metals.** P. J. Goodhew . . . 377
Role of delta ferrite in thermal aging of type 316 weld metals. S. R. Keown and R. G. Thomas. . . . 386
Effect of sodium on reaction of nitrogen with type AISI 316 stainless steel. E. A. Trevillion . . . 393
Equilibrium segregation of phosphorus at grain boundaries of Fe–P, Fe–C–P, Fe–Cr–P, and Fe–Cr–C–P alloys. H. Erhart and H. J. Grabke . . . 401
Influence of prestrain and strain aging on cleavage fracture in C–Mn steel. R. Sandström, G. Engberg, and Y. Bergström . . . 409
Creep deformation of low-alloy 1Cr–Mo–V steel at 565°C. D. A. Miller, W. J. Plumbridge, and R. A. Bartlett . . . 413
Effects of room-temperature prestrain on creep-fracture behaviour of Nimonic 105. H. Burt, I. C. Elliott, and B. Wilshire . . . 421
Critical assessment **Creep crack growth behaviour and theoretical modelling.** K. Sadananda and P. Shahinian . . . 425
Mechanism of upper-nose temper embrittlement in Mn–Ni–Mo A533 gr. B steel. J. P. Naylor and M. Guttmann . . . 433
Transient stage in low-stress viscous creep of titanium and cobalt. G. Malakondaiah and P. Rama Rao . 442
Electrical resistivity and length changes during precipitation in Fe–V–C alloy. W. G. Hall and T. N. Baker 447
High-temperature observations of braze alloy spreading by oxide penetration. J. M. Cohen, J. E. Castle, and M. B. Waldron . . . 455
Cleavage fracture in face-centred cubic metals. S. P. Lynch . . . 463
Quasibrittle fracture and cleavage initiation in Fe–2·6Si single crystals in different environments. H. Vehoff, P. Neumann, and W. Rothe . . . 469
Statistics for static strength of fibre bundles. L. N. McCartney. . . . 471
Mechanisms of mode II (sliding) crack advance. R. A. Smith . . . 475
Short communication **Diffusion of carbon in austenite.** H. K. D. H. Bhadeshia . . . 477

Papers presented at conference on 'Elastic waves and microstructure' held at the University of Oxford on 16–17 December 1980

Acoustic emissions associated with fracture processes in structural steels. G. Clark, D. J. H. Corderoy, N. W. Ringshall, and J. F. Knott . . . 481
Acoustic emissions from structural steels and weldments. C. P. Debel, A. Nielsen, and W. E. Swindlehurst 492
Sources of acoustic emission during crack growth in ferritic steels. G. Green . . . 505
Influence of microstructure on acoustic emission during deformation and fracture of Fe–3·5Ni–0·21C steel. H. N. G. Wadley, C. B. Scruby, P. Lane, and J. A. Hudson . . . 514
Influence of proof stress, composition, and microstructure on acoustic emission during ductile fracture in medium- and high-strength steels. P. McIntyre and D. Harris . . . 525
Acoustic emission from structural steels and Fe–C alloys. T. J. C. Webborn and R. D. Rawlings . . . 533
Acoustic emission under biaxial stresses in unflawed 21–6–9 and 304 stainless steel. M. A. Hamstad, E. M. Leon, and A. K. Mukherjee . . . 541
Characterization of microstructure by backscattered ultrasonic waves. H. Willems and K. Goebbels . . 549
Ultrasonic attenuation and microstructure in low-carbon steels. R. L. Smith, W. N. Reynolds, and H. N. G. Wadley . . . 554
Relationships between metallurgical texture and ultrasonic propagation. M. G. Silk . . . 559
Texture studies of austenitic weld metal using elastic surface waves. G. J. Curtis and N. Ibrahim . . . 566
Ultrasonic studies of anisotropy in cold-worked layer of used rail. D. E. Bray and D. M. Egle 574
Use of elastic waves to study relaxation in metallic glasses. M. G. Scott and A. Kursumovic. 583
Acoustic emission from dislocation motion in precipitation-strengthened alloys. C. R. Heiple, S. H. Carpenter, and M. J. Carr . . . 587

Contents

Influence of microstructure on acoustic emission during deformation of aluminium alloys. C. B. Scruby, H. N. G. Wadley, K. Rusbridge, and D. Stockham-Jones 599
Acoustic emission and microstructure in aluminium alloys 7075 and 7050. S. McK. Cousland and C. M. Scala. 609
Errata 88, 153, 232, 470
Use of units in *Metal Science* 330
